Dear Editor

I am submitting you our article "AnaCoDa: Analyzing Codon Data with Bayesian mixture models" to be considered for publication as an application node in Bioinformatics on behalf of all authors. The authors (Cedric Landerer, Alexander Cope, Russell Zaretzki, and Michael A. Gilchrist) developed a software package to aid researchers with analyzing coding sequence and ribosome footprinting data. The software integrates multiple models published and unpublished and makes them available via the R scripting language.

The authors declare no competing interests.

All authors have approved the manuscript for submission.

The submitted material has not been published or is in consideration for publication by other journals.

with best regards

Cedric Landerer
